WORK COMPLETED

Detailed breakdown of the RedVeg project updates covered by this bill.

1. Admin Login & Password Management

Forgot Password / Reset Password option.
Separate secure logins for Owner, Admin, Editor and other employees.
Employee account activation and deactivation.
Role-based access permissions.
Login and activity logs.

2. Role-Based Access Control

Owner: Full business control, manual order creation, employee permissions and access to sensitive reports.
Admin: Manage operations and create manual orders, subject to assigned permissions.
Editor: Access only assigned sections; cannot create manual orders or access restricted financial data.
Customer Support / Data Entry: Update authorized customer and order information, but cannot create manual orders, edit restricted prices or access financial masters.
Permissions enforced at the backend/API level, not only through UI restrictions.

3. Manual Order Creation

Create New Order feature accessible only to Owner and authorized Admin users.
Search existing customers by name or phone number; add new customers where permitted.
Select products, weight, variants, cutting options and quantity.
Automatically calculate subtotal, discounts, delivery charges and grand total.
Record payment method and payment status; add delivery address, delivery slot and customer notes.
Generate a unique Order ID and save the order in the common Order Master/database.
Record creator, timestamp and order source as "Admin Manual".
Prevent unauthorized employees from creating orders through the API.
Do not mark payment as Paid without verification.

4. Delivery & Offer Configuration

Configurable settings for minimum order value (initially INR 999), delivery radius (initially 5 km), Free Delivery ON/OFF toggle and delivery charges.
Coupon and discount eligibility, plus minimum order requirements for offers.
Settings editable by authorized Admin users and not hard-coded into the application.
